MILTON KEYNES

A UNIQUE EXPERIENCE

ASTON MARTIN RED BULL RACING FACTORY

THE SIMULATOR

Think you have what it takes to handle a Formula One™ car? We offer a fully-immersive and highly realistic Simulator Experience that gives you the chance to work alongside our driver development and test engineers for a unique insight into how our own drivers train for races. A hugely complex computer system designed to react as our F1™ car would out on track, the simulator allows our drivers and engineers to anticipate every possible scenario of the race weekend ahead.

This exclusive hospitality offering allows you to pick your Formula One™ circuit of choice, receive one-on-one coaching by our simulator engineers and then put yourself to the ultimate test to see how you cope with the complexity of driving an F1™ car. This isn't for the faint hearted and offers a very true representation of the fitness, stamina and concentration required by a modern day F1™ driver.

The Simulator Experience is offered on a rental basis for either up to 6 drivers on a full day hire, or up to 3 guests on a half day hire. This experience can be added to any event or meeting room booking, alternatively it can be enjoyed as a standalone experience here at the home of the Aston Martin Red Bull Racing Team.

THANK YOU
